

REPORTS

The campus nurse shall report to the health authority those students attending school or who have been attending and are suspected of having a notify-able condition as defined by state law and the Texas Board of Health.

The principal shall exclude a student from attending school who has a communicable condition as defined by the Texas Board of Health (25 TAC 97)

A medical release from a licensed physician shall be required before a student may return to school or after a period of time corresponding to the duration of the Communicability of that disease.

The campus shall provide to the parents of students and the teacher in the class in which the student who has a communicable disease attended literature explaining the symptoms and treatment of that disease.

The campus must inform the Office of the Superintendent of the case.
